

INTERIM USE LIMITATION AREA FOR THE CALIFORNIA TIGER SALAMANDER AND DELTA SMELT

Within this area, follow the indicated instruction(s) for the active ingredient(s) you intend to use. If multiple instructions apply to your pesticide use, you should follow all of the instructions.

PESTICIDE	INSTRUCTION
acephate	A
alachlor	B
aluminum phosphide	A
atrazine	B
bensulide	A and B
beta-cyfluthrin	A and B
bifenthrin	A and B
carbaryl	B
chlorophacinone	A
chlorothalonil	A and B
chlorpyrifos	A and B
cyfluthrin	A and B
cyhalothrin (lambda)	A and B
cypermethrin	A and B
deltamethrin	A and B
diazinon	B
dimethoate	A and B
diphacinone	A
diquat dibromide	B
endosulfan	A
EPTC (eptam)	B
esfenvalerate	A and B
ethoprop	A and B
fenpropathrin	A and B
fipronil	A and B

PESTICIDE	INSTRUCTION
fluvalinate	A and B
imidacloprid	A and B
malathion	A and B
mancozeb	A
maneb	A
metam sodium	A
methomyl	A and B
methoprene	A
methyl bromide	A
metolachlor	B
oryzalin	A
oxydemeton-methyl	A and B
oxyfluorfen	A and B
PCNB	A and B
phenothrin	A and B
phosmet	A
propargite	A and B
resmethrin	A and B
simazine	B
S-metolachlor	A and B
strychnine	A
tetramethrin	A and B
thiobencarb	B
trifluralin	B
zeta-cypermethrin	A and B

INSTRUCTION A – Do not apply the pesticide within 200 feet if applied by ground nor within 400 feet if applied by air, of fresh-water ponds (including natural or manmade, such as stock ponds), slow moving streams or pools within streams, vernal pools and other ephemeral or permanent water bodies which typically support inundation during winter rains and hold water for a minimum of 12 weeks in a year of average rainfall.

INSTRUCTION B - If application is made in compliance with the California Dormant Spray Regulations (3 Cal. Code Reg. §6960), do not apply the pesticide within 100 feet of all water and submerged lands below the ordinary high water level, freshwater streams that drain into the Bay, and channels with tidal influence. If not applied in compliance with the California Dormant Spray Regulations, do not apply the pesticide within 100 feet for ground nor within 400 feet for aerial applications of all water and submerged lands below the ordinary high water level, freshwater streams that drain into the Bay, and channels with tidal influence.
