INSTRUCTION A – Do not apply the pesticide within 300 feet of the high water line of salt or brackish water marshes. Also do not apply the pesticide within 200 feet of a cordgrass/pickleweed stand (see photos below) if any part of the stand occurs within 100 feet of the high water line of a salt or brackish water marsh.

INSTRUCTION B - If application is made in compliance with the California Dormant Spray Regulations (3 Cal. Code Reg. §6960), do not apply the pesticide within 100 feet of all water and submerged lands below the ordinary high water level, freshwater streams that drain into the Bay, and channels with tidal influence. If not applied in compliance with the California Dormant Spray Regulations, do not apply the pesticide within 100 feet for ground nor within 400 feet for aerial applications of all water and submerged lands below the ordinary high water level, freshwater streams that drain into the Bay, and channels with tidal influence.

Native California Cordgrass – *Spartina foliosa*

Pickleweed - *Salicornia virginica*
