

INTERIM USE LIMITATION AREA FOR THE CALIFORNIA CLAPPER RAIL

Within this area, do not apply the pesticides listed below within 300 feet of the high water line of salt or brackish water marshes. Also within this area, do not apply the pesticides listed below within 200 feet of a cordgrass/pickleweed stand (see photos below) if any part of the stand occurs within 100 feet of the high water line of a salt or brackish water marsh.

| |
|----------------------|
| acephate |
| bensulide |
| beta-cyfluthrin |
| bifenthrin |
| chlorothalonil |
| chlorpyrifos |
| cyfluthrin |
| cyhalothrin (lambda) |
| cypermethrin |
| deltamethrin |
| dimethoate |
| esfenvalerate |
| ethoprop |
| fenpropathrin |

| |
|-------------------|
| fipronil |
| fluvalinate |
| imidacloprid |
| methomyl |
| naled |
| oxydemeton-methyl |
| oxyfluorfen |
| PCNB |
| permethrin |
| phenothrin |
| propargite |
| resmethrin |
| tetramethrin |
| zeta-cypermethrin |

Native California Cordgrass – *Spartina foliosa*

Pickleweed - *Salicornia virginica*
