

INTERIM USE LIMITATION AREA FOR THE CALIFORNIA FRESHWATER SHRIMP AND THE TIDEWATER GOBY

Within this area, follow the indicated instruction(s) for the active ingredient(s) you intend to use. If multiple instructions apply to your pesticide use, you should follow all of the instructions.

PESTICIDE	INSTRUCTION
acephate	A
bensulide	A and B
beta-cyfluthrin	A and B
bifenthrin	A and B
chlorothalonil	A and B
chlorpyrifos	A
cyfluthrin	A and B
cyhalothrin (lambda)	A and B
cypermethrin	A and B
deltamethrin	A and B
diazinon	B
dimethoate	A and B
esfenvalerate	A and B
ethoprop	A and B

PESTICIDE	INSTRUCTION
fenpropathrin	A and B
fipronil	A and B
fluvalinate	A and B
imidacloprid	A and B
methomyl	A and B
oxydemeton-methyl	A and B
oxyfluorfen	A and B
PCNB	A and B
phenothrin	A and B
propargite	A and B
resmethrin	A and B
tetramethrin	A and B
zeta-cypermethrin	A and B

INSTRUCTION A - Do not apply the pesticide within 100 feet if applied by ground nor within 400 feet if applied by air, of all perennial streams or intermittent streams with perennial pools.

INSTRUCTION B - Do not apply the pesticide within 100 feet if applied by ground nor within 400 feet if applied by air, of lagoons, estuaries and backwater marshes that are adjacent to the Pacific Ocean; and freshwater streams up-gradient of and tributary to brackish habitats.
